IBM **SkillsBuild**

Certificate of Accomplishment

This certificate is awarded to

ADIESTI NURI AMANDA

has completed the IBM Skillsbuild University Education program, with the course titled:

Data - AI Agent for Data Analysis

and successfully delivered a final project as part of the IBM SkillsBuild University Education program requirements.

Hosted by Hacktiv8 Indonesia

Certificate ID: [redacted]
Training Period: Wave 13 - 28 August 2026
Total Learning Hour: 9 Hours
Issue Date: 01 Sept 2026

Riza Fahmi
Co-Founder & Chief Evangelist of Hacktiv8

Student Transcript

IBM Skillsbuild University Education

Profile

Student Name : ADIESTI NURI AMANDA
Transcript ID : [redacted]
Issued On : 01 Sept 2026
Course : Data - AI Agent for Data Analysis

About Program

IBM Skillsbuild University Education IBM SkillsBuild University Education is a collaborative program between IBM and Hacktiv8 aimed at equipping students and young talents with practical skills in artificial intelligence (AI). Through hands-on learning, participants gain experience in designing, building, and implementing AI Agents across various domains to improve productivity and solve real-world challenges effectively.

Skill/Competencies

Lesson	Objective	Course	Learning Hour
Foundation & AI Introduction	• Understand the fundamentals of data analysis and data classification • Explore how IBM Granite can be used for data classification and AI-powered solutions • Become familiar with Vibe Coding and IBM Bob for developing AI-powered applications		3 Hours 4 JP
AI Agent Development & Workflow Integration	• Understand the fundamentals of simple AI Agent development • Learn the workflow of automation and orchestration concepts • Practice using AI Agent and frameworks using IBM Bob		3 Hours 4 JP
Project Building	• Develops an end-to-end AI Agent prototype/project • Applies AI workflow concepts to solve real-world problems		3 Hours 4 JP
Total Learning Hour			**9 Hours / 12 JP**

The IBM SkillsBuild University Education Initiative is a collaborative program between Hacktiv8 and IBM SkillsBuild aimed at equipping participants with practical skills in AI, AI Agents, and workflow implementation through hands-on project development.

Project Score

IBM Skillsbuild University Education

Aspect	Description	Weight	Score
Completeness & Feasibility	Participant's ability to develop a complete end-to-end solution, demonstrate logical flow between components, create relevant prompts and configurations, produce outputs aligned with the objectives, and show that the solution is feasible to execute or realistically implement.	40%	98
Creativity & Innovation	Participant's ability to demonstrate originality, explore innovative ideas, modify or improvise existing templates, develop unique flows or integrations, and present solutions that provide additional value and future development potential.	25%	94
System Design & Architecture	Participant's ability to clearly design and explain the system architecture, define structured workflows from input to output, demonstrate logical integration between components, and create scalable and modular solution designs.	15%	96
Background & Impact	Participant's ability to demonstrate an understanding of real-world problems or specific needs, clearly and logically explain project objectives, link the solution to user benefits or real-world context, and show clear cause-and-effect thinking.	20%	91

Final Score	95.30
